Methodology note: Quarterly reporters (MooMoo, Futu, Oriental Harbour) report share counts quarterly. Between reports, AUM is estimated by repricing carried-forward shares at current Bloomberg closing prices. This is a departure from the prior methodology (Sean/Grace) which carried forward stale dollar values.

SYFE (\$1.0M on FEPI LN) is based on verbal report only -- no share count available. DRNZ (Thailand) uses Bloomberg closing price; Grace's original calc used \$15.86/share (pending confirmation). Oriental Harbour sourced from 13F filing (FNGU position only).
