Methodology: Quarterly reporters (MooMoo, Futu, Oriental Harbour) report share counts quarterly. Between reports, AUM is estimated using fund-proportional scaling: each exchange maintains its share of the fund's total AUM as reported by Bloomberg. This captures fund-level flows that pure mark-to-market ignores. SYFE (\$1.0M on FEPI LN) is verbal report only. DRNZ (Thailand) uses Bloomberg close; Grace's original calc pending confirmation. Oriental Harbour sourced from 13F filing (FNGU position only).
