

MicroSectors Asia Report

February 2026

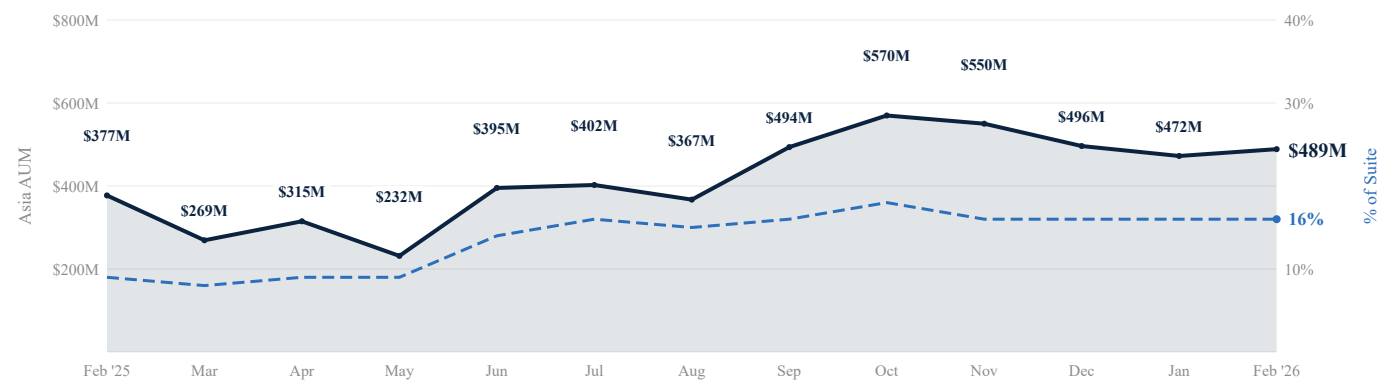

ASIA AUM	MOM CHANGE	EST. INFLOWS*	MARKET MOVE
\$489M	+3.5% +\$16.5M	+\$39.7M	-\$23.2M

OVERVIEW

- Korea (72.5%) and Hong Kong (26.4%) dominate MicroSectors AUM in Asia
- Gold exposure (GDXU, SHNY) drove AUM growth in an otherwise negative market
- New brokerage firm onboarded; ViewTrade contributed \$7.2M from Hong Kong brokerage channels
- Korea's share has recovered from 59.8% (Sep '25) to 72.5% (Feb '26) as the Korean retail market absorbed more MicroSectors products
- GDXU rose 89% on gold miner momentum, with SHNY (+60%) also benefiting from precious metals demand

Asia AUM

- Collected monthly from brokerage firms and custodians across 16 exchanges in 7 Asian markets
- Some brokers report AUM directly in local currency (KRW, JPY), converted to USD at month-end rates. Others report share counts, priced using Bloomberg month-end closes
- Quarterly reporters (Futu/MooMoo, Oriental Harbour, ViewTrade) provide data at quarter-end only. Between reports, positions are adjusted by each fund's global price change to avoid reporting stale values
- These quarterly estimates are replaced with actuals when new reports arrive

Global AUM

- Sourced from Bloomberg as of each month-end
- Covers all REX ETPs across ETFs and ETNs
- Used to calculate each fund's percentage of global AUM held in Asia and to decompose AUM changes into market impact and investor flows

Estimated Flows

- Each fund's month-over-month Asia AUM change is split into two components: market impact and estimated investor flows
- Market impact is the portion of the change attributable to the fund's global price movement
- Estimated flows are the residual — the AUM change not explained by price movement, representing net new investment or redemptions
- These are estimates. Actual fund flows, where disclosed by managers, may differ
